

# Torsdags Bridge

## **Bridgemate II** (nyeste version opdateret på vort udstyr 17-9-2011)

**Version: 1.6.1 Date: 26-6-2011**

Requires server: 1.3.107d USB usbs13107d.exe

File name: BM2\_1-6-1.BM2

Languages: Danish, Dutch, English, French, German, Italian, Norwegian, Swedish, Spanish, Turkish, Chinese

### New:

- Players can enter hand records on the Bridgemate at the end of the round.
- Players can view hand records on the Bridgemate of a board after its result has been entered and confirmed.
- New option 7 in TD-menu to view hand records.
- Show names directly after numbers are entered (before start of round 1), and possibility to correct numbers.
- Possibility to erase all previous entered data (scores and member numbers) when a Bridgemate takes over another table.
- Improved method of erasing scores from TD-menu (doesn't ask for round anymore, unless needed).
- Score verification screen shows score in NS or EW column (when American result method is selected).
- Scores erased from TD-menu or score recap are now also removed from the Bridgemate's internal memory.

### Bugs fixed:

- viewing the ranking and end-of-game summary could distort the internal backup of scores entered on the Bridgemate.
